Modern Mantels

Mantels Now in Vogue

The Mantels catalogued here are good examples of designs favoured by Architects, Builders, and Home Builders for present use, and are by manufacturers in touch with both the building and furnishing trades. They suit the various types of homes being erected in the best suburbs, and harmonise with the simple, practical furniture now being used. Well seasoned timber is used in their construction and the following woods are used—Oak, Silky Oak, Maple, Pine, and Tasmanian Oak. They are polished and finished to any shade of colour required. The standard opening for the larger Mantels is 36in wide and 37in high, and for smaller designs 35in x 35½in. Any design can be altered to suit special sizes at a small increase in cost. We can also quote for special Mantels to Architects' drawings and specifications.

Price list will be found on last pages of Catalogue.

Art Tiles

We carry a wide assortment of artistic hearth, wall and floor Tiles, and tile fireplaces, walls, verandahs, bathrooms, shop exteriors and interiors to instructions.

Prices given are in all cases for plain enamelled tiles. These may be had in various colours. Dull and other special finish tiles can be supplied at an increased price.

All Mantels, Grates, Tiles, and Kerbs may be purchased separately.

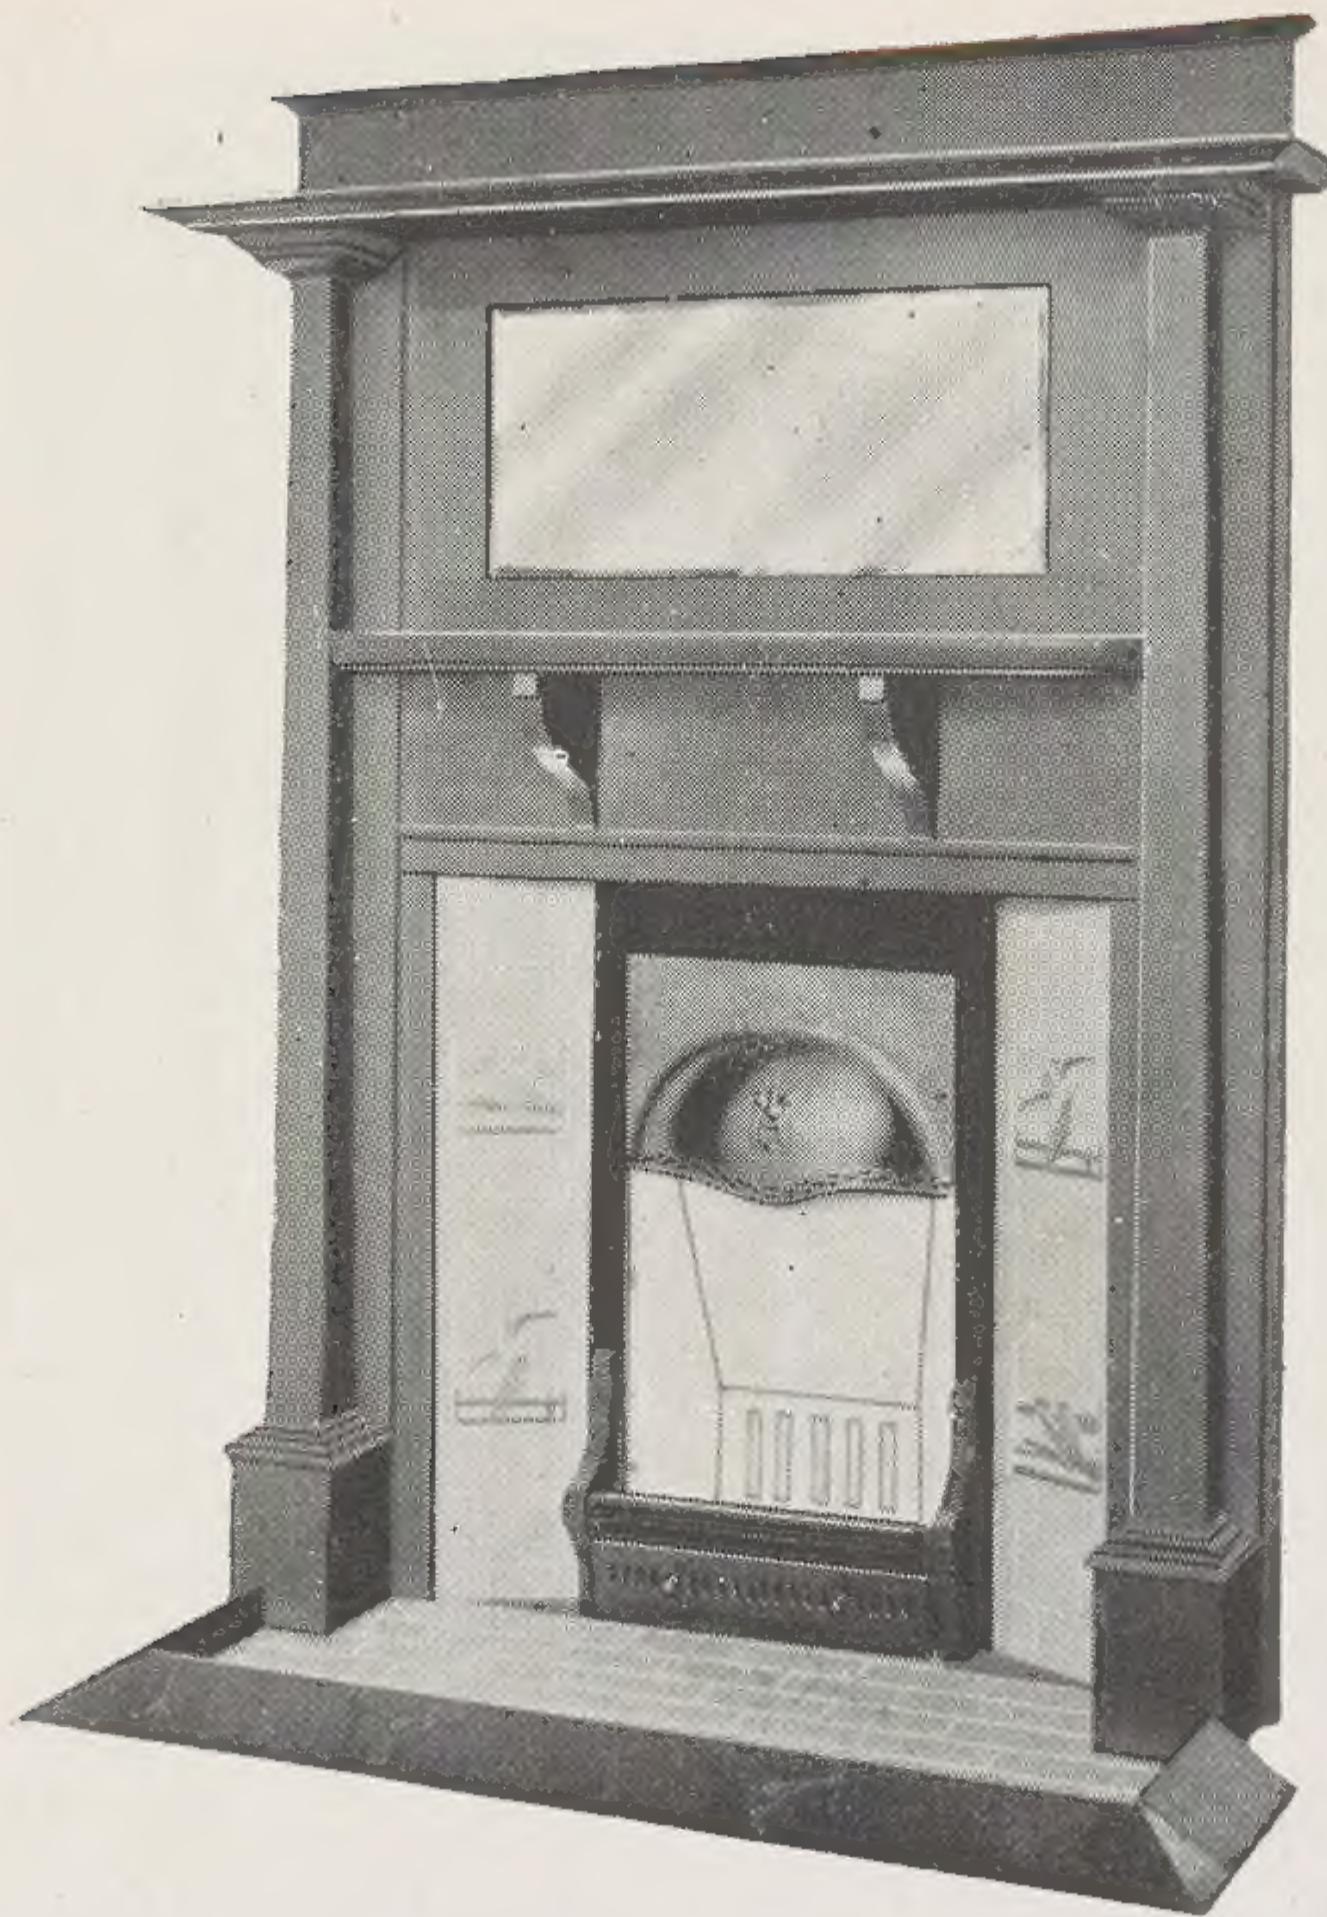

COUNTRY ORDERS.

We take every precaution in packing so as to ensure safe delivery, and make a charge at net cost price.

Prices will be found on last pages of Catalogue.

"*Esse*"
Heating Stoves

"*ESSE*"
PATENT
HEATING
STOVES

The advantages of "ESSE" Stoves over the open grate are many. They will burn *continuously* if necessary—day and night. No smoke, gases, sparks, or ashes escape into the room. They are as cheerful as the open grate, as the patent Mica front shows the glow. They burn coal or coke, and are lighted in the ordinary way. The Stove is filled, or the fuel replenished at the top, and the consumption of fuel and heat can be regulated as required. They give much more heat than any ordinary fire. They ventilate the room without making a draught. Handsome, economical, clean, healthy. Save work, give more heat, suit any room or building.

DINING ROOM LIGHTS

The most used room in the home is the dining or living-room. Light it well. These Electric Pendants are designed for light, and are most artistic in design. Prices are moderate.

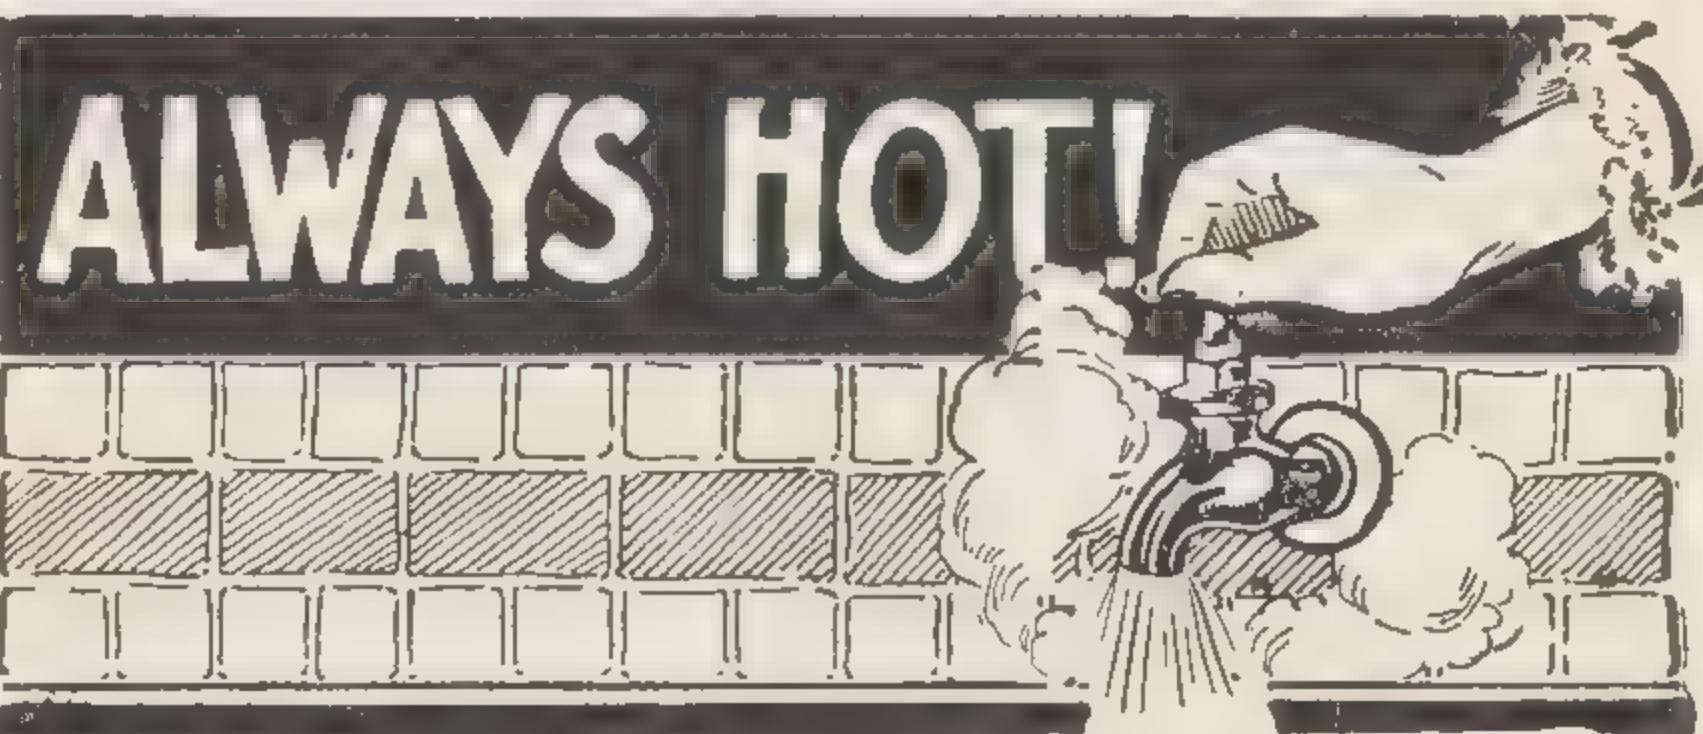

Semi-Indirect Pendants

have bowls of beautiful flint ware with hand-painted floral designs burnt on or etched in. Other designs are in self colours, pink, blue and old ivory. The beauty is in the glass. Very little metal to tarnish by time or flies.

Call in and select a design to suit your colour scheme. They are shown lighted to give an idea of their real appearance. Catalogue free for your address.

JOHN DANKS & SON Pty Ltd

324-330 Pitt St.(Near Liverpool St) Sydney
391-403 Bourke St. Melbourne

Hot Water at the taps—any number of them—when most wanted—for the morning rush on the baths—for the kitchen and scullery—in the laundry, or wherever required.

"IDEAL" DOMESTIC BOILERS

will supply from 50 to 2,500 gallons per hour, according to size, and deliver it pure and wholesome. They require attention at long intervals only. The adjustable draught maintains the correct temperature automatically, and the slow combustion system reduces the fuel bill. The Ideal boiler furnishes 50 gallons of really hot water from 9 lbs. of coke. The system wherever certain and cheap hot water is required. Write or call for particulars.
